Welcome to our catalog for 2024 where you can create lists and make requests directly to our team. Additionally, you can view live inventory, place new orders, and check order history on our B2B website: b2b.select-sport.com.

Please reach out to co@selectsportamerica.com or ecw@selectsportamerica.com to create your own unique login.

EVERYTHING FOR YOUR CLUB

When we say everything for your club – we mean it!

SELECT is proud to offer a full range of soccer and futsal equipment. Whether you need a new soccer ball, futsal ball, athletic wear, or a range of training equipment – SELECT is a total supplier for amateur, professional, and youth athletes.

Several new soccer ball designs and a totally redesigned goalkeeper glove range have been added for 2024 to complement our well-rounded lineup to provide your team with the best option for your level of play.

Sustainable initiatives are a focus point at SELECT Sport. We want to reduce our use of plastic and to use even more recycled materials in our products. This year our Brilliant Super will feature a new construction which utilizes partially recycled materials.

Complete the kit for your team with our new clothing line for matches and training. Choose from stock or fully custom jersey options that best fit your team's needs. SELECT is committed to producing the highest quality clothing and equipment that you have grown to expect from our soccer balls.

Get ready to take the field with SELECT – the player's choice.

GOALKEEPER GLOVES

NEW

SELECT's revamped goalkeeper glove range for 2024 is the result of sourcing and developing materials and technologies that aim to deliver a high level of comfort, grip, durability, and protection that goalkeepers need at every level.

Our top of the line 88 Pro Grip is a lightweight glove in a negative cut with 3mm Quartz latex for a perfect grip in all kinds of weather. An airprene lining provides great comfort, flexibility, and minimal water absorption. The updated 77 Super Grip now features a negative cut palm, removable finger spines and airprene lining for a much higher level of comfort.

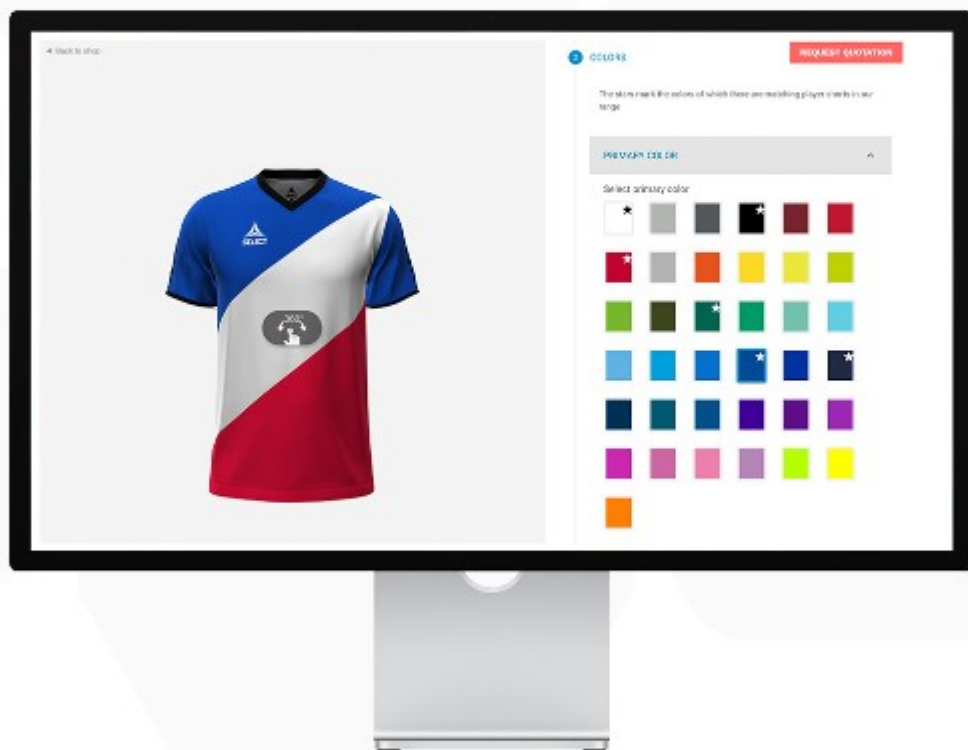

2024 also introduces the 34 Protection and 04 Youth Protection, formerly the 33 Protec and 03 Youth Protec. The name is not the only change as both gloves will now feature a more breathable and more comfortable flat cut palm with non-removable finger spines. With the aid of an Anatomical Fit System all gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus, ensuring comfort, flexibility and movement of the glove aligned with the speed of the fingers.

YOUR CLUB, YOUR SHIRT

Every club gets the possibility to create their own designs and express their identity in custom jerseys and shorts with SELECT. Through our special sublimation printing process, it is possible to generate complex designs with logos, names and numbers directly printed without any additional costs. If you are interested in an individual club shirt, contact the sports dealer of your choice, or send us an email at info@selectsportamerica.com.

THE ORIGINAL 32 PANEL BALL CONSTRUCTION

Every single football, handball and futsal ball from SELECT is based on the revolution from 1962, where our founder, Egil Nielsen, invented a ball made of 32 panels. The overriding desire was to create the most reliable ball with the most predictable, straight flight and a bounce neither too high nor too low.

It was impossible to make a perfectly round ball with just 18 panels, which was the standard construction of a ball in the past. With the 32 panels – 20 hexagons and 12 pentagons - SELECT succeeded in creating the roundest ball ever seen. Later, a group of American scientists won the Nobel Prize for discovering that the molecules of carbon with a special irradiation organize themselves as a completely round ball – something Egil Nielsen had already discovered and realized in his football with 32 panels, why the reinvention was named “the football molecule”.

A ball with optimum roundness is essential to obtain reliable aerodynamic – a straight flight and a controlled bounce. Our finest football, BRILLANT SUPER TB, has been thoroughly tested in a wind tunnel at the Institute of Health & Sports Science at the University in Tsukuba, Japan. The results show that BRILLANT SUPER has a better aerodynamic than other top balls in the market. The ball's classic construction with 32 panels means that the ball meets resistance at a later point in its trajectory through the air, thus retaining a steady, high speed over a longer period of time. This provides a stable and more predictable flight – highly valued by all football players.

The majority of our balls are still based on Egil Nielsen's original invention of the 32 panel ball construction, as we never compromise on quality, playability or durability.

THERMO BONDED

- QUALITY INSIDE AND OUT

BRILLANT SUPER TB has the characteristics that distinguish a classic SELECT ball and is suitable for matches at the absolute highest level. The materials are carefully selected and have exactly the qualities that give the best playability and durability.

The optimum roundness is ensured with the well known 32 panels spread over 12 pentagons and 20 hexagons. The outer material of the ball consists of synthetic leather with a light surface structure that minimizes air resistance.

Under the synthetic leather hides the SELECT natural latex Zero-Wing bladder with built-in balance point in the opposite end of the valve hole. On the outside of the bladder is a lining made of a 4 mm. thick and exclusive foam material. The outer material and the underlying foam give the ball a softer, lighter and a more comfortable touch. Despite the fact that the ball feels lighter, the weight is the same as a traditional football.

TB stands for Thermo Bonding, a method that activates the glue with heat and pressure to bond the 32 panels. There are no stitches, and the TB ball takes up less water keeping the original weight better when playing on a wet surface.

The ball has, among other places, been tested at the Institute for Health & Sports Science at Tsukuba University in

Japan. The test results showed that the ball – just like other balls from SELECT – faces less wind resistance in the first part of the flight, moves easier through the air and meets wind resistance later than other balls on the market.

The FIFA Quality Programme for Footballs was introduced in 1996 to harmonise and improve the quality of footballs. Focusing on the ball, the very heart of the game, the prestigious FIFA quality labels are only given to balls that have passed rigorous testing.

FIFA Quality Pro is reserved for only the best standard of match balls available. FIFA Basic is the newest standard focusing on cost efficiency, durability and safeguarding player safety.

Approval	Ball size	Circumference	Normal weight	Light weight
	3	60 - 62 cm	320 - 340 g	280 - 310 g
	4	63.5 - 66 cm	350 - 390 g	290 - 320 g
	5	68 - 70 cm	410 - 450 g	350 - 380 g
FIFA Basic	5	68 - 70 cm	410 - 450 g

HAND STITCHED

- HIDDEN BEHIND THE ELEGANT EXTERIOR

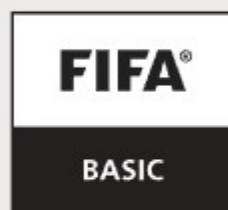

Common to all our balls is that the quality is high and the durability long. An optimally round football consists of 32 panels made up of 12 pentagons and 20 hexagons. The 32 panels are sewn together using 630 double stitches and 60 corner stitches and are closed off – especially for SELECT – with a double knot. The ball lasts longer this way.

Hidden behind the elegant exterior of the balls in our Pro and Club Series is a Zero-Wing bladder made of high-performance natural latex. The concept has been developed to ensure that not only the ball but also the bladder is as round as possible. We solely use latex bladders in our footballs with build-in balance point at the opposite side of the valve hole. This, together with the Zero-Wing concept, ensures a perfectly balanced ball with a very lively bounce.

To stabilise the ball and ensure that it remains round, the 32 panels are lined with several layers of textile material. The lining helps to adjust the softness and improves the contact between the ball and the foot.

The outer layer of the ball is made of synthetic leather in polyurethane (PU). The surface of this material can be either "shiny", "grain" or "pattern" and consists of lots of PU fibres. Combined, this gives a strong surface with consistent softness.

High quality is essential for SELECT. For this reason, each ball undergoes a stringent test at our production facilities in Pakistan. Here, they are tested for stitching, surface, roundness, circumference, weight, air retention and colour printing. Even the bladders are inflated to ensure perfect balance. Our standards for quality are the highest in the industry and the balls are of course tested and approved according to FIFA standards.

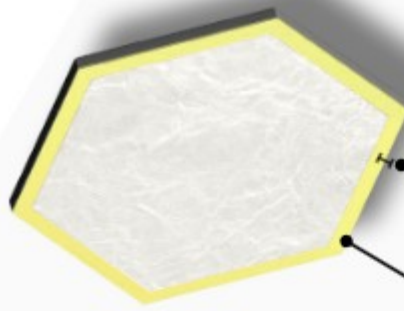

The FIFA Quality Programme for Footballs was introduced in 1996 to harmonise and improve the quality of footballs. Focusing on the ball, the very heart of the game, the prestigious FIFA quality labels are only given to balls that have passed rigorous testing.

HISTORY

AN ANATOMICAL WORK OF ART

The top model 88 PRO GRIP consists of 3 mm Quartz Latex guaranteeing a perfect grip in all weather conditions. The latex is wrapped from palm to backhand maximising the catching area, and the negative glove cut provides constant latex contact between the hand and the ball. The soft airprene inside provides optimum comfort, increases the glove's flexibility and ensures minimal water absorption when playing in wet weather.

With the aid of an Anatomical Fit System the gloves have been designed with a slight bend according to the natural gripping position of the hand. Thus ensuring comfort, flexibility and movement of the glove aligned with the speed of the fingers.

A wide wrist strap allows a feeling of stability and safety in the wrist. The wrist is asymmetric and has an elastic insert to ensure easy entry into the glove.

Types of cuts

Negative Cut

A popular glove cut choice that reminds of Flat Cut. This style of cut also has gussets between the palm and the backhand. The gussets of the 88 glove are also made of latex giving constant latex contact between the glove and the ball. Negative Cut fits snugger and the fingers are held in place giving optimal ball contact when catching. This is the most common cut among professionals.

Flat Cut

Traditional glove cut with a flat palm construction providing a larger area of contact and making the glove more flexible. This style of glove typically fits looser than many other styles with more room for the fingers. Flat Cut is the most popular cut used for finger protection gloves.

Latex technology

Flexion Latex

Durable latex developed for youth gloves. Suitable for all weather conditions

New Basic Latex

Durable latex with a fantastic grip in all kinds of weather that makes it suitable for both training and matches

New Softy Latex

Soft and durable latex - suitable for all weather conditions. Highly recommended to pre-wet for best grip possible

Dura Grip Latex

Soft and strong latex for all weather conditions. The latex is longlived and suitable for both training and matches

Dura Pro Latex

Strong and durable latex especially suitable for use on artificial grass

Professional Grip Latex

High quality latex for professional matches. The glove has a perfect grip in all kinds of weather.

Super Soft Latex

Very soft and durable latex, used for professional match gloves. Provides a good grip and optimum contact with the ball. Well-suited for all weather conditions.

Ultra Pro Latex

Soft and hardwearing latex, especially developed for our best youth gloves, that combines durability with a fantastic grip. For all weather conditions.

Quatz Latex

Top performance latex. Ideal for professional gloves. Provides a good grip in both dry and wet weather compared to other kinds of latex.

Adhesion Plus Latex

Top performance latex with a good grip in all kinds of weather and great contact with the ball.

Glove technology

Anatomic Fit System

Ensures correct fit, as the glove is designed according to hands' natural grip position

Punch Zone

In non-sliding material for increased force and reduction of the rotary effect on the ball

Wide wrist

Extra wide wrist strap for improved support and comfort

Comfort

Mesh on the inside of fingers to ensure good air circulation

Flexibility

Injection mold spiderweb design for a light-weight feeling and increased flexibility

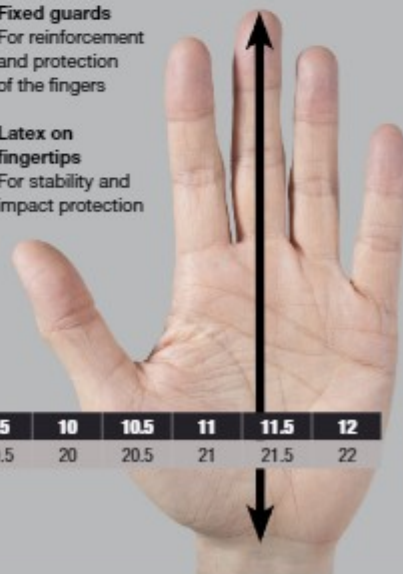

Protection

Fixed guards

For reinforcement and protection of the fingers

Latex on fingertips

For stability and impact protection

Glove size

Measure the length of the hand as shown and find suggested sizes in the chart below.

SIZE	1	2	3	4	5	6	7	8	8.5	9	9.5	10	10.5	11	11.5	12

ever since and are some of the longest in the history of the International Handball Federation. These partnerships have continued to this day. SELECT was appointed official supplier by the Danish Handball Federation. SELECT was appointed official supplier by the Danish Handball Federation for the Danish national football team, and in 1927 SELECT signed a contract to supply the Danish national football team.

SELECT naturally became a trendsetter.

SELECT introduced the first handball with 32 panels and balls made of synthetic leather, and many other innovations such as the first laceless football, the first inflatable football, and the first handball with a textured surface.

SELECT was specially selected for the ball production.

SELECT was given because of the exclusive leather that was used in the production of the ball. The name of the company was given because of the exclusive leather that was used in the production of the ball. The name of the company was given because of the exclusive leather that was used in the production of the ball.

SELECT products produced worldwide are based on the original principle of 32 panels. SELECT products produced worldwide are based on the original principle of 32 panels. SELECT products produced worldwide are based on the original principle of 32 panels.
